

Institutional Trading Intelligence

Final verification: 30 agents × 33 truth sessions = 990 test runs.

Non-destructive verification of every runtime agent against a Gold Standard Validation Dataset of 33 historical sessions covering 11 market condition categories. Each agent scored on Functional / Logic / Historical Accuracy / Integration / Performance / Confidence. Result: 0 VERIFIED, 24 PROVISIONAL, 6 NEEDS IMPROVEMENT. Layer 2 indicators sound (avg 38.8% accuracy, ADX leads at 63.6%). Layer 3 institutional naive (avg <25%). 4 missing capabilities documented with full implementation specs. Architecture frozen — no code modified.
